Castle of Temptation Scripts

Scripts intended for the C# application, Edi, created by dimnogro: <https://discuss.eroscripts.com/t/easy-device-integration-for-games-edi-game-selection-fix-assets-multi-channel-12-2025/108186>

Connects to your devices and forwards commands from the game to play the appropriate scripts.

Castle of Temptation

The mod files with BepInEx to enable integration.

Also included are 32 and 64-bit BepInEx versions, because it seems some storefronts have different versions.

The following elements are scripted:

- Caught Animations
A script will play when the player is captured by an enemy.
- Reactions
Quick reaction scripts will play whenever jumping or getting hit. Can be disabled in Edi by unticking the "Reactions" checkbox.

Shortcut Keys

- 1: Pause script playback.
- 2: Resume script playback.
- 5: Set script playback range to 40%.
- 6: Set script playback range to 100%.
- 0: Freeze character lust to 0. Press again to unfreeze.

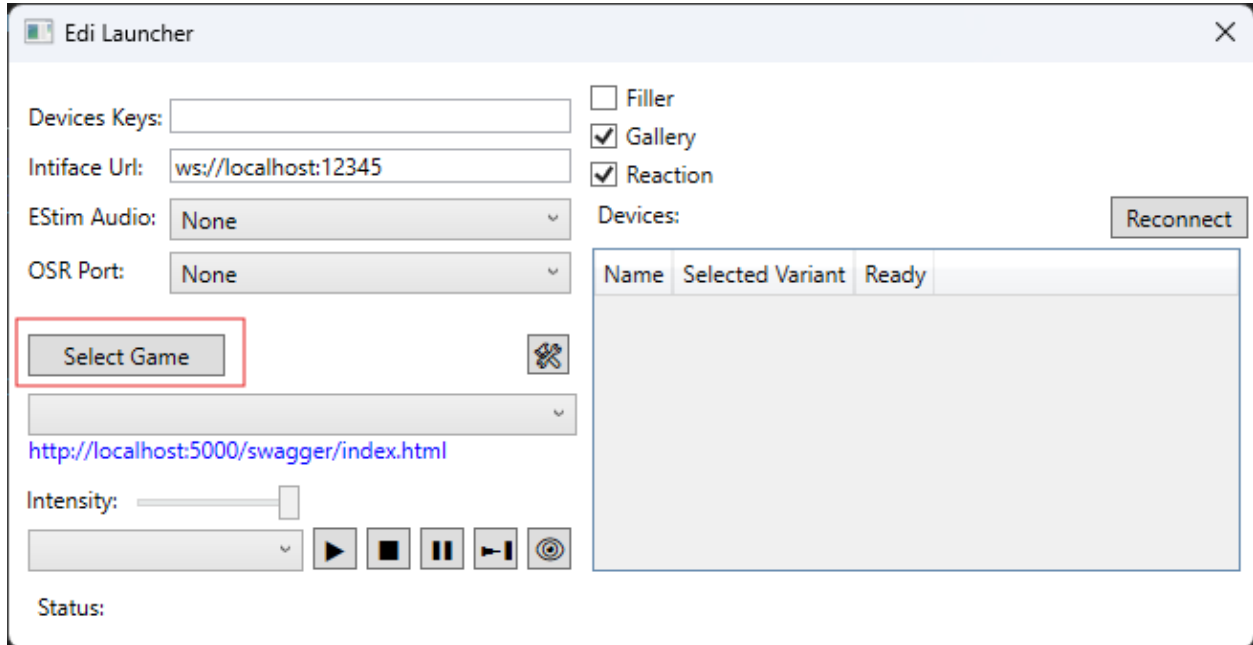

Configuration

Options can be configured in the “FunscriptMod” file located inside the “BepInEx/Config” folder.

- Scripts
 - FastScriptSwitching: True/False
Enable fast script switching. The level 1 boss has rapid animation changes. Set to true if your device is able to keep up.

Installation

Inside the Scripts folder you'll find an "EdiConfig.json" file and a "Gallery" folder containing the scripts next to it. Please download Edi from the link above and use the "Select Game" button to select the included "Edi-Config.json".

Inside “Castle of Temptation” you will find folders labeled “32 bit” and “64 bit”. Please check which version your game is and copy the contents of the corresponding folder into your game directory. If unsure, try the 32-bit version first, if it doesn’t work try the 64-bit version.

Once the files are copied over, it should look like this:
